

ARUN SHETTY

Generative AI Architect · 15+ Years

+91 9035550309 | arunshetty@outlook.com | [LinkedIn Profile](#)

CORE STRENGTHS

- RAG + LangChain + LangGraph orchestration
- Agentic AI & autonomous task orchestration
- AI-driven automation & report generation
- Platform evaluation: Azure AI Foundry vs. Databricks
- Cross-functional team leadership (15+ members)
- GenAI strategy & delivery alignment

TECHNICAL SKILLS

AI / GenAI

GPT-4o · GPT-4.1 · GPT-5.0 · Claude Opus · Azure OpenAI · LangChain · LangGraph · Agentic RAG · Databricks AgentBricks · Mosaic AI · Knowledge Graphs

Python & Frameworks

Django · Flask · FastAPI · asyncio · Pydantic · NumPy · Pandas · Matplotlib · OpenCV · Tesseract

Cloud & Platforms

Azure Functions · Logic Apps · App Services · Key Vault · Azure AI Search · Azure AI Foundry · Databricks · Cosmos DB · PostgreSQL · CI/CD · Docker · Jenkins

Frontend

React

Automation

Python Scripting · UiPath RPA · Workflow Optimization

CERTIFICATIONS

- Claude Certified Architect Associate — Anthropic (Skilljar)
verify.skilljar.com/c/ckhi5fogqzjg
- Designing Generative AI for Business with MS Azure OpenAI – Great Learning & Microsoft
- Agentic AI Course – Krish Naik Academy
- Microsoft Certified: Azure AI Fundamentals

PROFILE

Generative AI and Automation Architect with 15+ years of experience designing, developing, and deploying LLM-powered enterprise solutions across Azure and Databricks ecosystems. Proven expertise in scalable RAG architectures, LangChain/LangGraph workflows, and Agentic AI frameworks, with a focus on accurate and safe interfaces using DeepEval and GuardrailsAI.

Currently Senior Manager, GenAI Architect at PwC Advisory, leading Agentic RAG and document intelligence delivery for Dow Chemical, and driving reusable GenAI assets — including Talent Planner — for practice-wide impact. Recognized by leadership for AI innovation, reusability frameworks, and enterprise-grade delivery excellence.

PROFESSIONAL EXPERIENCE

Senior Manager, GenAI Architect

PwC Advisory — DE&A: AI-Driven Automation & Cognitive Solutions · March 2026 – Present

Client: Dow Chemical Company

★ PRODUCT OWNERSHIP— TALENT PLANNER

Conceived and built Talent Planner, a GenAI-powered internal tool that automates talent allocation across engagements and serve as its Product Owner end-to-end — from roadmap and requirements through delivery with the AC Bangalore GenAI Team.

Deployed on Azure Container Apps with a flexible LLM backend (Azure-hosted models or the Anthropic Claude API), the asset has already improved staffing turnaround and visibility for the practice.

Given its practice-level impact, Talent Planner is now positioned for a firm-wide rollout across all of Advisory practices, extending its benefit beyond a single practice to enterprise-scale talent planning.

► Project: ODMS — Agentic RAG Document Intelligence Platform

- Architecting a full-stack Agentic RAG Document Intelligence Platform for Dow Chemical using React, FastAPI, PostgreSQL, and Azure on the frontend with a Databricks AgentBricks backend.
- Designed a Bronze/Silver/Gold medallion ingestion pipeline with multimodal document parsing, GTE-large embeddings, and Mosaic AI Vector Search for enterprise policy document retrieval.
- Delivered AgentBricks Search Agent and Knowledge Assistant capabilities (Claude Opus-powered) covering policy overlap detection, compliance validation, and RAG-based Q&A.
- Implemented geo-aware scoping and LLM-assisted policy authoring, along with a hierarchical document schema (materialized path pattern) spanning global, regional, business, site, and facility levels.
- Led a platform evaluation comparing Azure AI Foundry and Databricks, producing a detailed service-by-service scorecard and parallel client-facing architecture slides to guide platform strategy.

- Upcoming: AI-102 – Designing & Implementing a Microsoft Azure AI Solution
- Oracle Cloud Infrastructure Foundations 2021 Associate
- Oracle Cloud Infrastructure 2021 Cloud Operations Associate
- Oracle Cloud Infrastructure 2021 Architect Associate
- Continuous Learning: Prompt Engineering, RAG Pipelines, AI Search, Document Intelligence

SOFT SKILLS

- Leadership & Mentorship
- Cross-team Collaboration
- Design Thinking
- Ownership & Continuous Improvement

EDUCATION

B.E., Electronics & Communication

Adichunchanagiri Institute of Technology (VTU), 2008

- Optimized RAG prompts for a Gemma-based policy answer generator, achieving ~40% prompt length reduction while preserving retrieval accuracy under tight token constraints.
- Drove resolution of key retrieval architecture issues, including entity scope-shift re-retrieval and repetitive content generation, through structured internal change requests.

► Project: AMS — Knowledge Hub / Code Repository Analyser

- Led a structured fit-gap analysis of AMS CodeAnalyser against Knowledge Hub requirements, producing a 68-requirement register and prioritized build backlog across 13 functional domains.
- Directed enhancement of automated BRD and SOP document generation capabilities within the platform.
- Identified and prioritized key platform gaps spanning data connectors (ServiceNow, SharePoint, Confluence), governance/platform layer (SSO/OIDC, audit logging, document lifecycle), and export/UI improvements.
- Designed a multi-agent LangGraph architecture (Indexer, Navigator, Researcher, Writer, Critic) for automated runbook generation from code repositories, using parallel execution and Pydantic data models.
- Also acts as hiring manager for Gen AI engineering roles across Gen AI-SE, Gen AI-DS, and Gen AI DevOps tracks.

Associate Manager – Generative AI / Python Architect

Accenture · July 2013 – March 2026

► Project: Due Diligence Applications

- Led GenAI-driven Python application development using GPT-4o, LangChain, and RAG pipelines integrated with Azure AI Search and Cosmos DB.
- Designed modular GPT orchestration framework requiring no code changes for model upgrades.
- Built AI chatbot for ITDD with contextual memory and history retention using GPT-4o.
- Created a document scoring profile in Azure AI Search to prioritize the latest content for better retrieval accuracy.
- Delivered 6+ GenAI POCs transitioned to production, reducing manual effort by 40% and improving productivity by 30%.
- Built dynamic PowerPoint generation engine and chart insights automation using GPT-4o + OpenCV/Tesseract.
- Coordinated Infra, DevOps, and Release activities for FDD, ITDD, and DNA applications, ensuring seamless deployment and compliance.
- Recognized by PMO and leadership for exceptional technical delivery and innovation.

► Project: GenARC

- Architected end-to-end LLM workflow enabling context-aware Q&A and data summarization.
- Developed modular backend APIs and integrated GPT-based chart insights extraction.
- Implemented RAG-based search across documents, improving accuracy and response quality.
- Delivered document intelligence automation improving data consistency and speed.

► Project: Sales Samples Transformation

- Introduced innovative features including intuitive order pages, flexible reporting, vendor onboarding optimization, and persistent cart functionality.
- Automated data migration using Python and Django, reducing deployment time and human errors.

- Implemented Azure AD OAuth 2.0 authentication ensuring secure user and service access.
- Conducted thorough code reviews, testing, and documentation to maintain high delivery quality.
- Led a 3-member team, promoting continuous learning, certifications, and collaboration.
- Coordinated with multiple vendor teams for seamless integration and timely project delivery.
- Recognized by clients and leadership for innovation, delivery excellence, and quality focus.

► **Project: Oracle Dx4C**

- Built 4 Python-based automations in Novo Nordisk, reducing ~3 hours/day of manual effort and improving operational efficiency.
- Developed reusable assets like RPA Orchestrator, Dependency Management Tool, and Automation Experience Platform using Django and Jenkins, enabling cost-free bot orchestration.
- Improved ticket management and categorization, enhancing response time and incident resolution throughput.
- Contributed DevOps dashboards integrating Git, Jenkins, Selenium, Docker, and UiPath, improving deployment visibility.
- Led and mentored team members in Python, Django, DevOps, and Oracle DX4C modules, promoting upskilling and certifications.
- Recognized for delivery excellence — on-time, zero-defect releases, and 2.5x higher incident resolution than peers.

► **Project: Vodafone NewCo — On-site Lead, Siebel CRM**

- Supported the Siebel NewCo Stack by triaging production defects, managing incidents, and overseeing release activities to ensure smooth operations.
- Served as the primary on-site coordinator, collaborating with offshore teams to resolve issues efficiently and maintain SLA adherence.
- Developed and implemented automation scripts for recurring manual jobs, significantly reducing execution time and operational overhead.
- Handled ad-hoc production job execution and provided prompt support for Priority 1 incidents, ensuring minimal downtime.
- Prepared and reviewed functional design documents for Oracle Customer Hub (OCH) and Enterprise Data Quality (EDQ) integrations.
- Supported Solution Architects in defining and validating architectural design decisions for complex integrations.

Design Analyst / Siebel Developer / Programmer

Capgemini — Enterprise Application Integration (Siebel CRM) · Dec 2009 – June 2013

- Extensive experience in Siebel EAI, including Integration Workflows, Web Services, VBCs, Siebel Adapters, SOAP/WSDL, XSL, and DTD.
- Configured and customized Business Components, Applets, Views, and Workflows; implemented automation through Workflow Policies.
- Delivered end-to-end integration solutions for clients including SSE PLC, VMware, T-Mobile, Fidelity, and GE Healthcare.
- Led development of Siebel UCM interfaces and OCH/EDQ design, supporting initial and delta data loads and data quality improvement.
- Designed real-time and batch integration interfaces between Siebel and external systems using PL/SQL and UNIX scripting.
- Received multiple client appreciations, including Dream Team 2009 Award (GE) and 10/10 client rating.

CLIENT-FACING EXPERIENCE

Onsite Co-Ordinator & Dev Lead — Leading Telecom Company, Newbury, UK

- Siebel Communications implementation and support; led a team of nine from multiple nationalities. (12/2017 – 05/2019)

Onsite Co-Ordinator & Dev Lead — Leading Energy Company, Portsmouth, UK

- Siebel Universal Customer Master; greenfield Master Data Management implementation. (03/2016 – 05/2017)

Application Developer — Cloud Computing & Virtualization Company, Bangalore, India

- Siebel Universal Customer Master; customized the Master Data Management module. (07/2013 – 04/2017)

Awards & Recognition (selected): Accenture Ace Award · Client Appreciation (P&G, Novo Nordisk) · Innovation Champion Award · PMO Leadership Recognition · Dream Team Award (GE Healthcare) · Client 10/10 Rating (GE) · Knowledge Contribution Award · High Performer Recognition (Novo Nordisk, 2.5x incident resolution).
